

UK MP Threat: Get Vaccine Or Be Banned From Working

The world is about to experience the utter scourge of Scientific Dictatorship, aka Technocracy. Non-vaxxers will be literally ostracized out of normal society, unable to work or travel. This will create an underclass segment of society barely able to survive unless they submit to the Technocrats. □ TN Editor

A British MP faced backlash Monday after suggesting that employees in the UK should not be allowed to go to work unless they can prove that they have been vaccinated against COVID-19, when the shot becomes available.

“If vaccination works and if we’re confident it’s safe, and all indications so far are good, then I can certainly see the day when businesses say: ‘Look, you’ve got to return to the office and if you’re not vaccinated you’re not coming in,’” said Tom Tugendhat.

“And I can certainly see social venues asking for vaccination

certificates,” Tugendhat added.

Far from being some extreme leftist politician, Tugendhat is a *Conservative* MP, he chairs the foreign affairs committee under Prime Minister Boris Johnson’s government.

Tugendhat also suggested that there are precedents for requiring vaccinations for foreign travel.

“I remember when I used to travel rather more than I do now - when you go into certain countries you had to show a yellow fever certificate and if you did not have a yellow fever certificate you weren’t allowed in the country and that was that,” said Tugendhat.

“There was no debates, no appeals and no further requests. And I can see a situation where yes, of course you’re free not to have the vaccine, but there are consequences,” he added.

Tugendhat also suggested that vaccine status could even be required to use public transport, saying “It would depend what the public services were, and who and when, so I wouldn’t want to start predicting.”

“But I do think that if things are shown to be safe then rejecting them when they have a wider effect on the whole of society is going to have consequences,” the MP added.

Tugendhat’s suggestion is just the latest in a string of indications that anyone who chooses not to be vaccinated will be effectively ostracised from society.
